AIRCRAFT HIGHLIGHTS

25X1

This report presents interpretation and accompanying photography of significant changes at Sino/Soviet aircraft production facilities from

25X1

AIRFRAME PLANT ORDZHONIKIDZE 126
KOMSOMOLSK, USSR

(Figures 1 and 2) shows 14 SU-7 (FITTER) crates at this plant, four of them in the shipping area and ten in the woodworking area. Firm identification of these crates was made through a correlation of the following facts:

25X1

25X1

AIRCRAFT ENGINE PLANT TUSHINO 500
MOSKVA, USSR

Coverage provided the first high resolution photography of the new probable engine test facility at this plant. This facility is totally different from any seen at Soviet engine production facilities, and probably represents a new process for engine testing. The facility contains nine vertical tank-like objects, but no apparent means for exhausting burnt fuel. For this reason, the process appears to be one involving "cold flow" testing of air breathing engines.
